K&N® Cabin Air Filters replace your vehicle's stock cabin filter with a reusable design that cleans and freshens incoming air. They are electrostatically charged to grab and hold dust particles. K&N® cabin air filters help control odors while they help capture most mold, mildew, fungus, spores, bacteria and germs. When they get dirty they can be cleaned and reused and best of all, they come with a 10 year/Million mile limited warranty.

If you need any assistance please call 1-800-858-3333 to speak with a representative in our Customer Service Center before returning the product.

When applicable, refer to owner's manual for manufacturers installation/removal instructions. The following are helpful steps when replacing/servicing cabin air filter with K&N® cabin air filter.

1. Cabin air filter is going to be located underneath the hood on the firewall. Fig. 1
2. Open the hood and pull back the rubber molding on the passenger side approximately halfway. Fig. 2 & 3
3. Remove 3 bolts and then take off the cowl. Fig 4 (Note. Some models will have 2 clips that need to be pressed to gain access to the cabin filter. Inside two bolts may need to be loosened in order to push the speed nuts forward to provide clearance for the filter) Fig. 5 & 6
4. Remove the cabin air filter door. Fig. 7
5. Remove dirty cabin filter from housing & clean any debris that might be present in the cabin filter housing and install K&N® Cabin Air Filter. Fig. 8 & 9
6. Reverse steps 1-4 to complete cabin filter installation. With the cabin filter installed, clean an area on the cowl and apply the K&N® Stop Decal. The decal will help notify others that this is a re-usable cabin filter.
