Thank you for purchasing a quality Hellwig Product.

PLEASE READ THIS INSTRUCTION SHEET COMPLETELY BEFORE STARTING YOUR INSTALLATION

1. Remove the factory installed sway bar and all the mounting hardware. Do not discard the end link assemblies and the U-plate mounting bolts as they will be used for reinstallation of the new front sway bar.

2. Install the D-shaped poly bushings on the sway bar in the same location as the factory sway bar. Position the sway bar up on the vehicles frame using the U-plates provided. Fasten with the mounting bolts that were removed in step (1). Leave loose at this time to allow for adjustment later.

3. With the sway bar properly aligned and the end links are aligned properly, torque all the mounting hardware to the factory specifications. SEE PHOTO (1).

4. Test drive your vehicle and recheck your installation re-torque if necessary. Recheck your installation on a regular monthly basis thereafter.

ATTENTION INSTALLER: BE SURE THAT THE CUSTOMER RECEIVES THIS INSTRUCTION SHEET, ALL IMPORTANT NOTE CARDS AND THE WARRANTY FORM
